Highly reliable 3-way coin sorters

The NRI s² SSD is the high-performance three-fold sorter for the G-13.mft and v² colibri coin validators. Every coin is routed securely and reliably due to the NRI solenoid technology. Available in 4 versions your coins are always on the right track.

Flexible use:

- Any path can be cash-box chute
- For G-13.mft and v² colibri top and front entry models
- Variable mounting positions thanks to optional NRI mounting frame

Customized coin return:

- For G-13.mft and v² colibri entry models with return chute:
 - parallel front – in front of the right-hand sorting path s² SSD-3001
 - in line – next to the right-hand sorting path s² SSD-3002
 - parallel rear – behind the right-hand sorting path s² SSD-3003

s² SSD-3001

s² SSD-3002

s² SSD-3003

s² SSD-3004

- s² SSD-3004 for G-13.mft and v² colibri front entry models without return chute, coins return through front plate

Options:

- NRI mounting frame for simple installation on coin validator
- Full level sensing for hoppers or change tubes etc.
- Power supply using separate screw terminal

Technical data:

Supply voltage:	12V up to 24V DC
Temperature range:	0°C up to +60°C
Relative humidity:	Up to 93%
Condensation:	Not permitted
Coin processing:	Diameter: 15–31.5 mm (middle sorting chute up to 33mm) Thickness: 1.5–2.5 mm (depending on mounting position up to 3.3mm)
Dimensions:	Height: 57mm Depth: 65mm Width: 110mm s ² SSD-3004, without return chute Width: 149mm s ² SSD-3004, without return chute Width: 115mm s ² SSD-3001/-3003, bottom parallel return
Mounting position:	Vertical, max. deviation: ± 2°

Coil technology

v² colibri

With the NRI s² SSD sorters you and your application are always on the right track.
