

CR100

COIN RECYCLER

Money Controls

CR100

Description

The CR100 is a compact, integrated coin sorter and recycler that accepts coins in bulk, accurately sorts them into dedicated hoppers, and provides correct change out. Auto-jam detection and clearance functions minimize downtime and maximize customer satisfaction.

Easy software integration is provided through a user-friendly API using a standard USB connection. Security is provided through audit data that can detail comprehensive records of coins in and out. CR100 is commonly paired with note recyclers to make exceptional self-checkout or self-serve kiosks.

Benefits

Faster transactions. Move customers through the checkout line quickly at 50 coins in, 2 coins per second acceptance, 8 coins per second payout

Compact dimensions. Adaptable design integrates with ticket or kiosk enclosures

Less operator interventions. Auto jam detection and clearance functions lessen the need for service calls

Reduce installation time. Easy setup and use with automatic hopper value and identification

COIN RECYCLER

Specifications

Dimensions (H x W x D mm)

- 294mm x 369mm x 320mm

Coin Capacity
